

SurgyPad

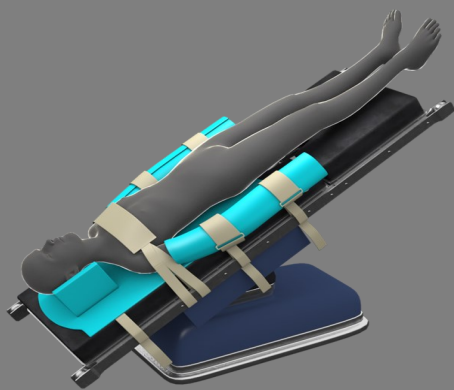

A Unique & Revolutionary Patient Positioning System

PROCEDURES

Laparoscopic | Robotic | Gynecology | Urology | Colorectal | General | Thoracic | Cardiac

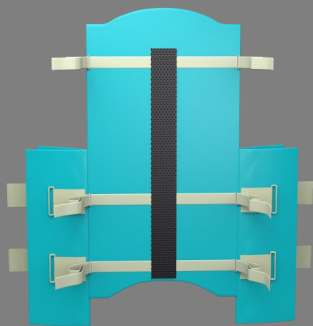

POSITIONING

Trendelenburg | Reverse Trendelenburg | Lateral Tilt

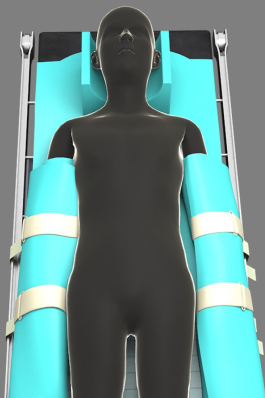

☒ SAFE

- Single-use eliminates cross-contamination risk
- High density, latex-free & water wicking foam
- Unique foam sleeves wrap around patient's arms for protection
- Pressure-relieving foam eliminates risk of brachial plexus injury
- Suitable for patients with elevated BMIs

☒ SECURE

- Built-in arm protectors with Velcro straps secures the arms close to the patient's body
- Anti-skid strip on the back of the SurgyPad adds traction between SurgyPad and mattress
- Innovative 6-strap system further secures SurgyPad to table
- Adjustable body strap

☒ Cost & Time Effective

Setup time < 60 seconds

Quick standardized removal procedure leading to incredibly low turnover time

Reduces "never-events"

Saves facilities 20% to 50% in costs

SurgyPad
